Summary

Full-stack developer with expertise in building scalable, high-performance web and mobile applications using React.js, Next.js, Node.js, and Strapi CMS. Proven experience in designing modern architectures, integrating APIs, and optimizing UI/UX to deliver measurable business outcomes. Strong collaborator with a track record of improving performance, usability, and team productivity.

Skills

Languages: JavaScript, TypeScript

Front-end: React.js, Next.js, Redux, Tailwind CSS, React Native, Vite.js, Mini Program Studio

State Management: Redux, Context API, Zustand

Back-end: Node.js, Express.js, Strapi CMS

Databases: MySQL, PostgreSQL, SQLite, MongoDB, Firebase

Tools: Git, GitHub, Postman, VS Code, REST APIs, CI/CD

Experience

Full Stack Developer, StratAgile – Kochi, India

Oct 2023 – Present

- Develop an AI-powered marketing asset generation platform that allows the creation of automated campaign materials through intelligent prompts, reducing the production time by 80% with real-time job polling and multi-tenant support.
- Spearheaded front-end development for an HRMS platform using React.js and API integration, reducing onboarding time by 30% through an optimized UI/UX.
- Collaborate with the Flutter team to develop a scalable backend using Strapi (Headless CMS) for a website, enabling seamless content management and efficient API delivery
- Develop a cross-platform trading application using Mini Program Studio framework.
- Design an interactive internal company portal using Node.js and MySQL for the backend and React for the frontend to showcase team activities, scores, and photos, resulting in a 25% increase in employee engagement.
- Built a custom tool for Zabbix using Node.js and the Zabbix API, including features like PDF and CSV export, automating report generation

React Js Developer, Zymsi – Bengaluru, India (Remote)

Apr 2023 – Oct 2023

- Developed a full-featured gym booking platform with a responsive, user-centric front end using React.js and Tailwind CSS.
- Enabled users to search gyms, book classes, manage profiles, and post reviews through an intuitive interface.
- Built a dedicated partner dashboard for booking verification, gym updates, and user communication.
- Connected and optimized RESTful API integrations for real-time booking and data synchronization.
- Improved front-end performance through lazy loading, code splitting, and efficient state management (Redux/Context API).
- Ensured cross-browser compatibility and responsive design for consistent user experience across devices.

Projects

WebInsightTool

webinsighttool.com

- Architected SEO/performance auditing platform for 400+ users, enabling automated scans and detailed dashboards.
- Leveraged AI-assisted development tools (AWS - Q Developer, Chat GPT) for rapid prototyping and debugging, improving development speed and feature delivery.
- Delivered rapid mobile-ready results using Next.js and Tailwind CSS, enhancing accessibility and user engagement.
- Automated CI/CD deployment with Vercel and GitHub actions, reducing the release cycle time.
- Technologies: Next.js, Tailwind CSS, Vercel, GitHub

Personal Portfolio

github.com/portfolio

- Developed a portfolio website using Next.js and Tailwind CSS, showcasing skills and projects.
- Designed the website to be responsive and visually appealing, ensuring a user-friendly experience.
- The website was deployed on Netlify, ensuring continuous integration and delivery with automatic builds from GitHub, simplifying updates, and version control.
- Received positive feedback from the developer community for design quality and usability.
- Tools used: Next.js, Tailwind CSS, Netlify, GitHub
